

Methods in Cell Biology, Volume 51, 1996, Leslie Wilson, Paul Matsudaira, 0121352757, 9780121352752, Academic Press Incorporated, 1996

"A current and authoritative guide, Methods in Avian Embryology presents a combination of classical embryological techniques and modern molecular biological approaches to studying the developing avian embryo. The only one of its kind, this book is specifically devoted to providing a detailed approach to studying avian embryos. It also describes how to use this system to study problems in cell, developmental, and neurobiology. The protocols emphasize microsurgery, histology, and cellular and molecular marking, which are not covered in the usual molecular biology methods manuals."--[Source inconnue].
